DETAILED ACTION

1. Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-21 and 79-80, drawn to a virtual school system with the client used by a student and server processing the student interactions via a network classified in class 709, subclass 203.

Group II, claim(s) 22-31, drawn to display system with GUI templates classified in class 345, subclass 762.

Group III, claim(s) 32-47, drawn to display system for network resource browsing and navigating classified in class 345, subclass 738.

Group IV, claim(s) 48-78, drawn to display system that uses interactive module as operator interface classified in class 345, subclass 700.

Group V, claim(s) 81-86, drawn to test and education modules classified in class 434, subclass 361.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III, IV and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as setting up a virtual school system to educate students in a client/server network environment. In the case of invention II, it also has a separate utility such as educating students using GUI templates. In the case of invention III, the yet another separate utility is teaching students by allowing students to browse and navigate to

different network resource. In the case of invention IV, the separate utility is teaching students interactively via interactive modules that uses operator interfaces. Finally, in the case of invention V, the separate utility is assessing students' ability via criterion referenced test. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
